Visual Trait Assessment

An independent classer grades all progeny as either Tops, Flocks or Culls based on their visual assessment of all traits relative to the Site's Breeding Objective. This classing reflects the approach that may be undertaken in a commercial flock and is presented as a deviation from the average score. Progeny are also scored, between 1 and 5, on a range of visual traits which are also reported as deviations from the average score. Scores are reported as adjusted sire means.

*Progeny No is at weaning Further assessment results after shearing for the 2022 drop will be available in the Site Report released via merinosuperiorsires.com.au
